Contents

Volume 15

1 Editorial

2 Invited Review
Matrix-analytic methods in queuing theory
M.F. Neuts

13 Profiles of the European Working Groups
J. Krarup

38 Quantifying the benefits of information systems
J.P.C. Kleijnen

46 Special products and uncertainty in production/inventory systems
T.M. Williams

55 A model for a textile winding process
B.D. Bunday and W.K. El-Badri

63 Stochastic processes and their network representations associated with a production line queuing model
E.J. Muth

84 A Lagrangean relaxation heuristic for vehicle routing
W.R. Stewart, Jr. and B.L. Golden

89 Complements and substitutes among locations in the two-stage transshipment problem
D.M. Topkis

93 Hierarchical location-allocation problems: A classification scheme
S.C. Narula

100 Approximation algorithms for the *m*-dimensional 0–1 knapsack problem: Worst-case and probabilistic analyses
A.M. Frieze and M.R.B. Clarke

110 An improved enumerative algorithm for solving quadratic zero-one-programming
S.-H. Lu

121 Unconstrained quadratic bivalent programming problem
V.P. Gulati, S.K. Gupta and A.K. Mittal

126 A branch and bound method for multi-objective Boolean problems
D.J. White

131 Book Reviews

139 EURO Bulletin

Fourth EURO V Special Issue

141 Invited Review
On using discrete random models within decision support systems
J. van Nunen and J. Wessels

160 The computer as an aid to physical distribution management
W.B. Dowsland

169 Improving port performance in developing countries – A case study
E. Williamson and M. Daunt

178 Optimal dispatching strategy on an airline network after a schedule perturbation
D. Teodorović and S. Guberinić

183 Optimal buy, operate and sell policies for fleets of vehicles
B.W. Simms, B.G. Lamarre, A.K.S. Jardine and A. Boudreau

196 Solving network manpower problems with side constraints
W.L. Price and M. Gravel

203 Defect location clustering schemes
R.R. Barton

212 A heuristic lagrangean algorithm for the capacitated plant location problem
J. Barceló and J. Casanovas

227 Antithetic variate methods for simulations of processes with peaks and troughs
R.C.H. Cheng
237 On bounds for bulk arrival queues
D.D.W. Yao, M.L. Chaudry and J.G.C. Templeton
244 The role of weights and scales in the application of multiobjective decision making
M. Gershon
251 Multiobjective management of mining under water hazard by game theory
F. Szidarovszky, L. Duckstein and I. Bogardi
259 Monte Carlo versus numerical convolutions: Some critical remarks
B.J.J. Alting von Geusau
270 Book Reviews
280 EURO Bulletin

283 Invited Review
Quadratic assignment problem
R.E. Burkard
290 NSOR-25 Prize-Winning Papers
The data always win
B.A. Knoppers
Operational operations research at the Mathematical Centre
J.M. Anthonisse and J.K. Lenstra
Sharing profits and liabilities of a pool of dockers
K.M. van Hee
302 Case Studies
Forecasting transport requirements for district primary health care in Ghana: A simulation study
D.J. Wright, A. Bandurka, R. Amonoo-Lartson and H.J. Lovel
Initial supply and re-order level of new service parts
L. Fortuin
Analysis and simulation of a distribution system for flowers
P.F. Jansen, J.E. Rooda and M.E.A. Striekword
328 Short Communications
Use of LP in integrated planning: Some notes on a case report by Elshafei and Elhadidi
T. Burde
Measuring the efficiency of decision making units: A comment
G. Boyd and R. Färe
333 The non-Archimedean CCR ratio for efficiency analysis: A rejoinder to Boyd and Färe
A. Charnes and W.W. Cooper
335 Inventory planning in a deterministic environment: Continuous time model with concave costs
A. Bensoussan and J.-M. Proth
348 A forward algorithm and planning horizon procedure for the production smoothing problem without inventory
J.E. Aronson, T.E. Morton and G.L. Thompson
366 Preemptive scheduling of independent jobs on parallel machines subject to financial constraints
R. Słowinski
374 The shorter queue problem: A numerical study using the matrix-geometric solution
I. Gertsbakh
382 On the convexification of nonlinear programming problems: An applications-oriented survey
R. Horst
393 On the use of the simplex algorithm for the absolute deviation curve fitting problem
J.T. Buchanan and J. Hammerton
400 A decision process over variables and their number: Two-phase optimality conditions
M.F. Friedman and J.L. Winter
408 Book Reviews
416 EURO Bulletin
418 Contents Volume 15
